AN EASY TO DRY ALL-GRASS MIX OF ORCHARDGRASS AND TIMOTHY

An all-grass mix primarily designed to be seeded as a stand-alone crop to be fed to horses, dry cows, heifers or even milking cows. Also a great complement for new alfalfa and/or clover seedings. Includes 2 premium late heading orchardgrasses, and one early timothy, along with a late timothy to throw a few timothy heads over multiple cuttings for hay marketing purposes. Put your legume in the small box and seed this grass mix in the large box.

Soil Adaptation:

Tolerates variable soil conditions

Wet – The timothy component will thrive more in wet conditions.

Drought – Orchardgrass tolerates dry conditions better and will dominate the stand

Cutting Management:

Cut leaving a 3 to 4 inch stubble height.

Stand life:

With good management and proper soils, stand should last 3-5 years.

Traffic Tolerance:

Both species in the mix have an adequate traffic tolerance.

At A Glance

Product Formula (by weight)

80% Late Maturing Orchardgrass

20% Timothy

Uses

Dry Hay: Excellent

Haylage/Balage: Fair

Management Intensive Grazing: Marginal

Continuous Grazing: Poor

Establishment

Seeding Rate: 15-20 lb/A
straight stand

5-10 lbs/A with a
new seeding of alfalfa
and/or clover (reduce
legume rate by 25-
50%)

Depth: Shallow (surface to
¼") is ideal.
