

VERSA

A VERSATILE FORAGE GRASS MIX

An all-grass mix with very good drought and heat tolerance. Featuring Festulolium, the mix maintains the durability of fescue, but is high in nutritional quality.

Soil Adaptation:

Tolerates wetter soils well but also performs very well on good to drier soils.

Wet – Good but will not tolerate excessive standing water.

Drought – Good. Festulolium does not do as well in drought conditions as the other species.

pH Range –6.0 and higher.

Cutting Management:

Cut leaving a 3 to 4 inch stubble height. Ideally should be cut before grass heads.

Stand life:

2-6 years. Festulolium may start thinning out after 2 years.

At A Glance

Product Formula (by weight)

70% Foxtan Festulolium

17% Endurance Orchardgrass

13% HLR Orchardgrass

Uses

Dry Hay: Very Good

Haylage/Balage: Excellent

Management Intensive Grazing: Fair

Continuous Grazing: Poor

Establishment

Seeding Rate: 15-30 lbs/A straight seeding

2-10 lbs/A with legumes

Depth: Shallow (surface to ¼") is ideal.

Speed: Fast. Orchardgrass comes on a little later, but lasts longer.
