

KINGFISHER SURESTAND HYDRO BRAND

For both conventional and OMRI-approved grasses and legumes, these coatings improve the seed germination, early growth, and lifelong stand.

The Super Hydrating polymer holds water around the seed and keeps the micronutrients in concentration around the growing root, giving maximum benefit for germination and early growth.

Larger seed size helps with more even seed distribution and improved seed to soil contact.

KingFisher Surestand Hydro CT Contains—

- Hydroloc, a water absorbent technology that helps the seed hold on to water and establish in the presence of less moisture. Can also help the seed hold onto fungicide applications.
- Myco Seed Treat—blend of plant-beneficial bacteria and fungi (including Mycorrhizae) accompanied by a nutrient package to support them during their initial stages of growth. These microorganisms contribute to increased soil nutrient cycling, as well as improved productivity, giving the new seedling a lifelong benefit.
- Quickstart Micronutrient package (0.03 oz/lb of coating)-
 - 1% Iron
 - 10% Manganese
 - 40% Zinc
- Apron XL Fungicide (mefenoxam)—For protection against systemic downy mildews and diseases caused by soilborne Pythium and Phytophthora pp.
- Nitrogen-fixing Rhizobium bacteria (legumes only)

KingFisher Surestand Hydro Green OC (OMRI-Approved) Contains—

- Hydroloc hydration component to help the seed hold onto moisture
- Myco Seed Treat—blend of plant-beneficial bacteria and fungi
- Nitrogen-fixing Rhizobium bacteria (legumes only)
